

Army Certificate Removal of Explosive Risk

1. The portions of Sunflower Army Ammunition Plant described at addendum 1 were determined to contain contaminants in _____ (in sewers, soils, building, etc) that presented an explosive risk as that term is defined in the AREP, Exhibit _____. The specific areas of explosive risk are identified in addendum 2.
2. The Army performed the following work consistent with the Army's Plan, dated _____ in order to mitigate and remove the explosive risk: (generally describe the work performed for each area.)
3. Therefore the U. S. Army certifies and warrants that:
 - a. The work to remove the explosive risk described above has been completed in accordance with the Army's Plan
 - b. The Property meets the definition of 5X as that term is defined in IOC Pamphlet 385-1
 - c. The property is appropriate for transfer to the general public
 - d. The Property is appropriate to transfer for its intended use without deed restrictions related to explosive risk
